ATLS 4519 – Project Plan

Parth Mishra

Project: Dress Me – The Personalized Clothing Assistant

Description: Dress Me is an app that allows a user to generate outfits using pictures they provide of their own clothes. Users can upload pictures of their clothes in several categories and then mix and match their clothes to generate "outfits". Further functionality can include the ability to tag items according to color, season, pattern, material, et

Example (not actually what it will look like):

https://manageme.proto.io/share/?id=35011ba7-45b2-435d-9786-cae365961f00&v=2

Testing:

Testing the project will mainly be using through built in unit testing suite as well as loading the app on my personal device and attempting to use it.
